A little guidance for A, B and C

Print a page to try

Choose the Letter or A4 file for your paper size. Print at 100% / actual size. Pages 1, 2 and 3 are A, B and C; print one activity first to check the margins.

Color, trace and find

Name the picture and choose its colors. Start at each numbered dot and follow its arrow. Lift the pencil for the next number, then trace the two dotted copies. Try one letter of each case on the blank lines. Finally, circle every matching lowercase letter.

Use a familiar print style

These models show one simple print style, including a single-loop lowercase a. Letter styles and stroke orders can differ. If your learner uses another school style, use that on the blank practice lines.

Choose how much to do

A caregiver can name a letter, point to a start dot or demonstrate separately. If a stroke goes off the path, start that stroke again. Coloring, tracing and finding can be done in separate sittings.

Check the letter-finding answers

Count positions from left to right.
A / apple: positions 1, 2 and 3.
B / bear and ball: positions 1, 3 and 5.
C / cat: positions 1, 3 and 5.
