DRAWING SHEET · AGES 5–7

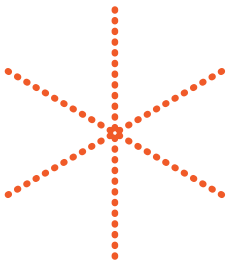

Draw a simple snowflake

Follow three steps, then draw one your own way.

You'll need a pencil and an eraser. Draw each line freehand in the space below.

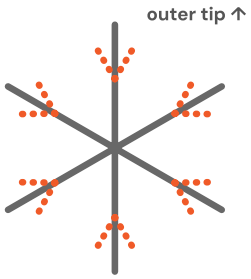

Orange dots: add these Gray lines: already drawn Draw all your lines solid.

1 Cross three lines.

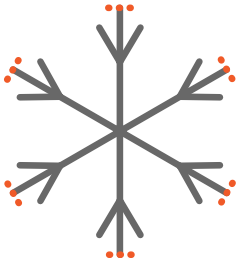

Draw one line up and down. Cross it with two slanting lines at the same middle point.

2 Add a V to each arm.

Put the point of each V on an arm. Open its two ends toward that arm's outer tip.

Start with the top arm, then do the other five.

3 Finish the tips.

Draw one short line across the end of each arm. Your snowflake has six finished tips.

Your turn to draw

Start in the middle. Try longer branches or little circles to make this one yours.
